progeCAD, the AutoCAD® alternative for a fraction of the price

A complete 2D/3D DWG CAD with Extra Tools included

Proge CAD 2013 professional is the perfect CAD tool in terms of price/performance for drafters, detailers, architects, engineers, technical advisors and almost anyone who works with DWG/DXF drawings. It is powered by the most intelli CAD engine and is affordable and powerful DWG CAD software fully compatible with windows 8.

Proge CAD 2013 contains a number of new important features and enhancements to offer customers improved performance, stalsility and speed. It reads and writes DWG file format from v. 2.5 to 2014. It offers i CAD Lib blocks manager with over 22000 blocks, PDF import and export, toogle Earth, Publishing Extension, Express Tools, ACIS solid modelling, Photo realistic Rendering, PDF, DWF, JPG printing, Raster Image management, Raster to vector conversion, gradient hatch, Polygonal layout view ports, Etrack, Polar Tracking, Easy Arch parametric plugin for architects, customisation with VB, VBA, C++ and Lisp.

Proge CAD's original format is DWG. This ensures unrivaled compatibility with Auto CAD without any need for file conversion. It lets the user export drawing files to any previous Auto CAD version from 2.5 right through Auto CAD 2014 both in DWG and DXF formats. The DWG drawings can be shared between proge CAD and Auto CAD without losing any critical information.

Anybody familiar with Auto CAD can immediately use proge CAD without any training proge CAD 2013 also provides a lot of exclusive tools to improve the productivity on project development.

A one-year subscription based maintenance and support programme is available. It offers a variety of benefits to help customers get the most out of their proge CAD software. Hence upgrade costs can be cut down and more value can be received.

Easy Arch, the automated building tool, designed to increase productivity in architectural and interior design and renovation, offers 2D parametric walls, windows doors, stairs, roof as well as a library of dynamic blocks to create personalised interior furnishings. Imperial measurement is also now supported.
