Exam Answer Key

Skills Exam 3 – Mechanical Parts Layout

1. You have multiple Model Space viewports. One of them has a blue border. What does that indicate?

   c. It is the active Viewport.

2. How can you create a floating (not tiled) viewport in Model Space?

   d. You cannot create floating Model Space viewports.

3. Using Model Space viewports does not allow you to:

   a. Specify how many edits can be made before a view synchronization is launched.

4. When a locked Layout viewport is activated, to what color does its edges turn?

   a. Red

5. To prevent a viewport from appearing on a plot or print, what workflow would you employ?

   d. Place the viewport on a non-plotting layer.

6. If you want to create a three-view orthographic projection of your model in a Layout, what is the advantage of choosing a four-view setup instead of a three-view setup?

   c. Four-view allows the viewports to be placed in a 2x2 grid, while three-view does not.

7. Which of the following is not a benefit of dimensioning in Paper Space?

   d. Each Dimension Style must be scaled by the inverse of its intended scale.

8. With Paper Space dimensions present, panning or zooming in an unlocked viewport will have what effect?

      c. The dimensions will become disassociated with the model.

9. What is the name of the named object that contains all the settings necessary for a desired print?

      b. Page Setup

10. In the Print dialog, selecting *Layout* from the *What to print* pulldown will disable what control? (Select all that apply.)

      a. Fit to paper

      d. Center on page
